**The crisis and the 40+ anomalies in Cosmology have been resolved, not by new Physics but by a new physical paradigm of the universe.**

Cosmology is in crisis! 95% of the universe is an unknown mysterious unidentified Dark Matter and Dark Energy. It has 40+ anomalies, inexplicable or inadequately explained. It is believed the Hubble Constant should have one value but accurate methods give two values. In 2020 this Hubble disparity reached  $5\sigma$ . A crisis was declared. New physics was advocated. Herein, is a revolutionary new paradigm of the physical universe! A bold new physical model, which harmonizes the Hubble values, has no inherent anomalies and where the 40+ anomalies are inherent characteristic features. A model with no physical or mathematical abnormalities like singularities. A bold new model which explains 100% of the universe and is concordant with Classical Physics and Quantum Physics. A model named Zybert Cosmology, in Zybert-Cosmology.pdf.
