Potential competing interests: No potential competing interests to declare.

1. Please add substantiation of the contribution to theory and practice, then show the scientific novelty of the study conducted compared to the already known techniques/approaches, and why readers need to read the present study!
2. Please clarify the practical limitations of the results and add some recommendations!
3. The discussion of the research is clearly explained and described, but it would be better if the authors conveyed the practical limitations and potential open problems for further research.
