Dear authors of this paper, thank you for what you are contributing to the scientific world. Below are some of the comments and suggestions I have on the manuscript with the title "Liver Function Test Abnormalities and Associated Factors Among Liver Disease Patients at the University of Gondar Comprehensive Specialized Hospital, Northwest, Ethiopia: A Cross-Sectional Study".

1. Dear authors, I kindly request an extensive language edit as there are many grammatical errors throughout the document.
 2. Please kindly revise the affiliations of the authors correctly. The format could be as follows:
Superscript, School or Department, College, University, Town, P.O. Box, Country
Background
 3. The background needs major revisions –
 4. Dear authors, please try to show us the burden of liver disease at least in East African regions and in Ethiopia.
 5. Please restructure the background - there are repetitions of ideas and the flow of ideas is not good.
 6. Write the long form if the word appears for the first time, and you can use its abbreviations then after (e.g., LFT in the 3rd paragraph).
- Methods and Materials
7. The methods and materials section also needs a major revision.
 8. Please include the sampling techniques and procedures part.
 9. Also include inclusion and exclusion criteria.
 10. Indicate your study population and study participants.
 11. Method used to analyse liver function tests.
 12. By whom those data were collected.
 13. Please clearly indicate who your study participants are - are they participants already with a known liver disease?
