**Potential competing interests:** No potential competing interests to declare.

## **Abstract Section Feedback:**

The abstract is detailed but lacks a description of the methodology and design/approach, which is crucial for the paper to be published. The author should consider clearly communicating the approach, techniques, and justifications.

## **Introduction Section Feedback:**

Reducing repetition in this excerpt in order to communicate more clearly was done but could be improved further to clearly bring out the arguments of various antagonistic sides of the discourse on power.

## **Conclusions and Discussion Feedback:**

The discussions in the context of stratified groups and resistance are appropriate, but the use of figures and tables could bring out key arguments.

## **Citation and References Feedback:**

The reference style is still not streamlined.
