Review of: "Comparative Analysis of Machine and Deep Learning Techniques for Text Classification with Emphasis on Data Preprocessing"

B. Shamreen Ahamed[1]

1 Sathyabama Institute of Science and Technology

The paper tells about an interesting topic that matches today's research innovation. There are many ideas that can be inferred; however, some of the following aspects can also be incorporated as part of the study:

1. The comparative analysis can be improved among the various algorithms involved.
2. The novelty and motivation of the study needs to be added.
3. The results should be compared and tabulated.
4. The overall research gap can be further emphasized.
