Potential competing interests: No potential competing interests to declare.

Please add a methodology section to your paper so we can learn how you came up with the identified challenges. For example, you may do a simple literature review; however, you must have specific criteria for the inclusion/exclusion of papers from your study.

The solution must be linked with identified challenges, while some of the solutions have no linkages with the challenges. We cannot propose our thoughts/opinions as solutions. The solution should have a direct link with identified challenges.

The study concluded with the revision of laws and policies. However, in the challenges, it does not talk about limitations caused by laws and policies. The conclusion must be linked with findings and recommendations.
