Dear Author

This article is very important and useful in nuclear medicine. There are some corrections to this article:

1. In line 11, the photon energy units are MeV, not MV.
2. What is the meaning of "100 MU"?
3. Ref 1, do you mean WHO?
4. Ref. 6 must be IAEA Report 31.
5. MeV must be written as MeV in the entire manuscript.
6. Where are the number of figures?
7. Please add a discussion.

With best regards,
