Potential competing interests: No potential competing interests to declare.

1. Authors need to rephrase the title.

2. There is a lack of novelty in the manuscript.

3. Attributes count is not clear in the proposed method.

4. Literature review is missing.

5. References are not cited properly; authors need to follow the journal reference style.

6. Details about the targeted dataset are not available in the article.

7. Coding screenshots are not needed to display.

8. Tabular comparison of potential works in recent years needs to show in the Related Work section. (Replaced "Relative works" with "Related work.")

9. Also, there is a need to improve the English throughout the manuscript.

Finally, I would like to suggest a major revision.
