## **Evaluation of Chemical Content and Phytochemical Composition of Yemeni Almond Cultivars**

This article has the potential to be accepted, but some important points have to be clarified or fixed before we can proceed and positive action can be taken.

My observations are as follows:

1. The article contains interesting information on the phytochemical composition of Yemeni almonds.
2. The quality of the work presented in the chapter is very good.
3. The article is scientifically sound.
4. The article is well written and can be understood by those interested in Nanotechnology Based Drug Delivery.
5. The manuscript consists of several typographical errors; the authors should check the manuscript thoroughly.
