# Heated tobacco stick

Addiction Ontology

## Source

*Addiction Ontology*

**Definition:** A product that is formed of tobacco processed in such a way as to make it suitable to be used in a heated tobacco-containing product.

*This definition was imported from the Addiction Ontology (see <https://addictovocab.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.*

*Definitions imported from the Addiction Ontology (AddictO) are what are known as ‘ontological definitions’. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.*

*Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.*

*Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.*

*Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.*
