# Nicotine-containing product

Addiction Ontology

## Source

[Addiction Ontology](#)

**Definition:** A product that includes or contains nicotine for ingestion by the user.

**Comment:** This class overlaps with tobacco-containing product but is distinct from it as tobacco-containing products can have the nicotine removed and nicotine-containing products may not have any other tobacco constituents in them (e.g. nicotine gum).

**Curator note:** The relation with 'nicotine' is 'has part' and not 'contains' because contains is reserved for spatially enclosing a separate entity.

*This definition was imported from the Addiction Ontology (see <https://addictovocab.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.*

*Definitions imported from the Addiction Ontology (AddictO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.*

*Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.*

*Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.*

*Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.*
