Potential competing interests: No potential competing interests to declare.

Dear author,

I find the article interesting, even if the theoretical input, with its clumsy processing and the literature used, does not seem balanced with the application of the topic on the example of the state of tourism in Spain.

I recommend for improvement:

\* to cite notice from the Transition Pathway for Tourism

([https://ec.europa.eu/commission/presscorner/detail/en/ip\\_22\\_850](https://ec.europa.eu/commission/presscorner/detail/en/ip_22_850)), mainly 3 principles (DIGITAL - Green - Resilience),

\* to add information HOTREC from Labour shortages in the hospitality sector: forward-thinking and practices sharing (<https://www.hotrec.eu/wp-content/uploads/2022/09/Labour-shortages-in-the-hospitality-sector.pdf>), mainly for Spain,

\* to mention importance of innovation, automatization, digitalization and robotization in tourism in relationship to labour market,

\* to emphasize transformation from Industry 4.0 to Industry 5.0 (AI, personalized experiences, singularity).

I would welcome more specific information when applying to Spain.
